## CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both

authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts*

where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index.

## OTHER INSPEC SERVICES

### SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm x 100 mm (6" x 4") cards.

### TOPICS

This is an SDI service based on standard profiles. There are over 70 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

### MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

# 1977-80 CUMULATIVE INDEXES

Search 4 years at a time  
using the latest  
Cumulative Indexes.

- **Save Time**

Your search is completed faster  
with the  
1977-80 Cumulative Indexes

- **Increase Precision**

The subject indexing has been  
revised to relate all the entries  
produced over the four year period  
to the 1980 subject headings.
